

7.The included code stub will read an integer, from STDIN.

Without using any string methods, try to print the following:1,2,3...n

Note that "" represents the consecutive values in between.

Code:

```
if __name__ == '__main__':
```

```
    n = int(input())
```

```
    for i in range(1, n + 1):
```

```
        print(i, end="")
```

output:

input:3

output:123
